DIGITAL HEALTH CENTE

NATIONAL INSTITUTE OF TECHNOLOGY .

An integrated online medical health technology management system for the students .

I'm Aman Kumar, a first-year B.Sc. B.ED ITEP (Mathematics) student at NIT Warangal, and I led this project from start to finish. From planning to execution, I gave my best to make this happen. Proud of what the team and I have built together.
Aman Kumar : Team leader of this project

On behalf of a dedicated team of 10 team members (Ashutosh Tiwari , Parameshwar Varfa , Ayush Dutta ,Preetham T Rishi ,Abhinav Singh, Shakamudi Hasini, Vishesh Sharma , Micheal Alvi , Akshika , Jashmi).

This proposal has been formally presented to the college administration

Administrative Endorsement

The proposal was presented to the College Administration and the Dean of P&D, Hod of Mathematics department , CDIS Head , erp technical officer Sudipta manna sir , who have formally appreciated the initiative. ***(but its not officially accepted)***

Technical Validation

The Technical Officer of the ERP division has reviewed and praised the system architecture. The college is independently working on the health Centre digitalization.

The recommendations and suggestions presented in this proposal have been formally appreciated by professor , and the college is actively working towards digitalisation of the Health Centre.

ABHA Campus Care | NIT Warangal © 2026

Digital Health Centre Portal

Book Appointments Online

Introduction

Problem:

The institute health Centre (IHC) at educational institutions serves thousands (students , faculty ...) . IHCs use pen and paper for registration and booking appointments . This causes long queues , waste of time for everyone .

- **Complex leave approval and academic attendance.**
- **Safety concern for off campus treatment .**

- Manual inefficiencies
- No online OPD appointment.
- Lack of electronic health records .
- Poor emergency Communication.

Grok

Our Solution

ABHA Campus Care is a role-based digital healthcare platform connecting Students, Doctors, Lab Officers, Pharmacy, Medical Staff, and Faculty Mentors.

Student Portal

Book appointments, view prescriptions, lab reports, and health records

Doctor Dashboard

Manage patient queue, consultations, and prescribe digitally

Lab Officer

Track samples, upload results, manage test reports

Pharmacy

Medicine inventory, prescription queue, dispensing records

Medical Staff

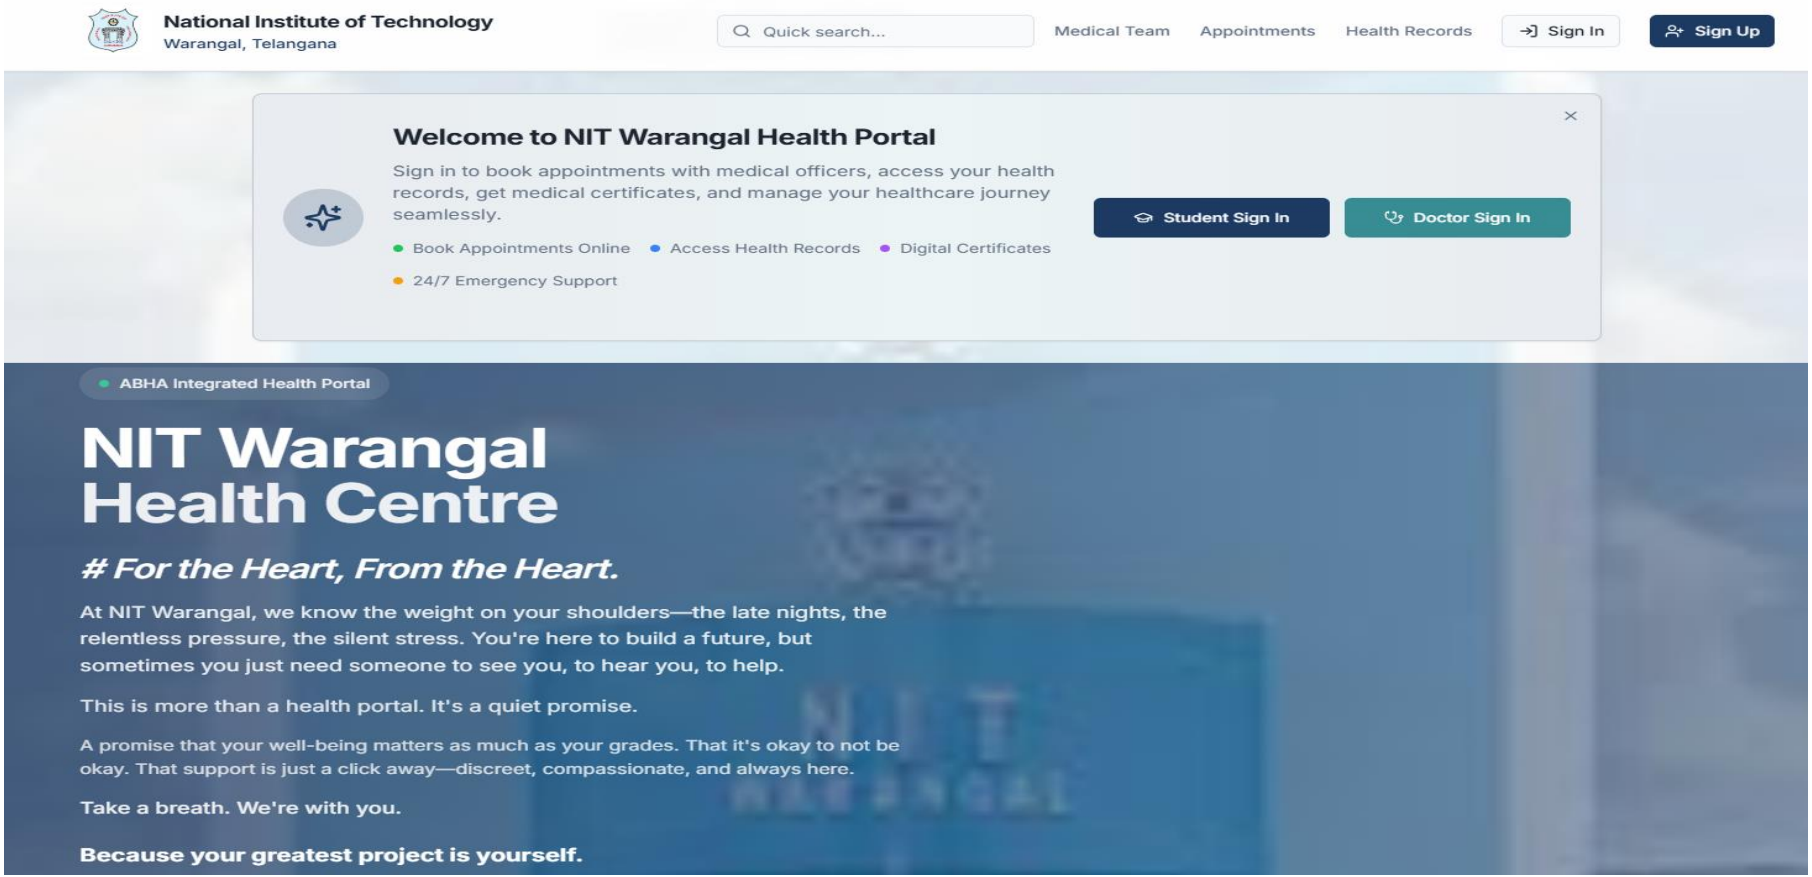
Patient vitals, first aid, ambulance requests, emergency alerts

Faculty Mentor

Student health alerts, medical leave approvals, mentee overview

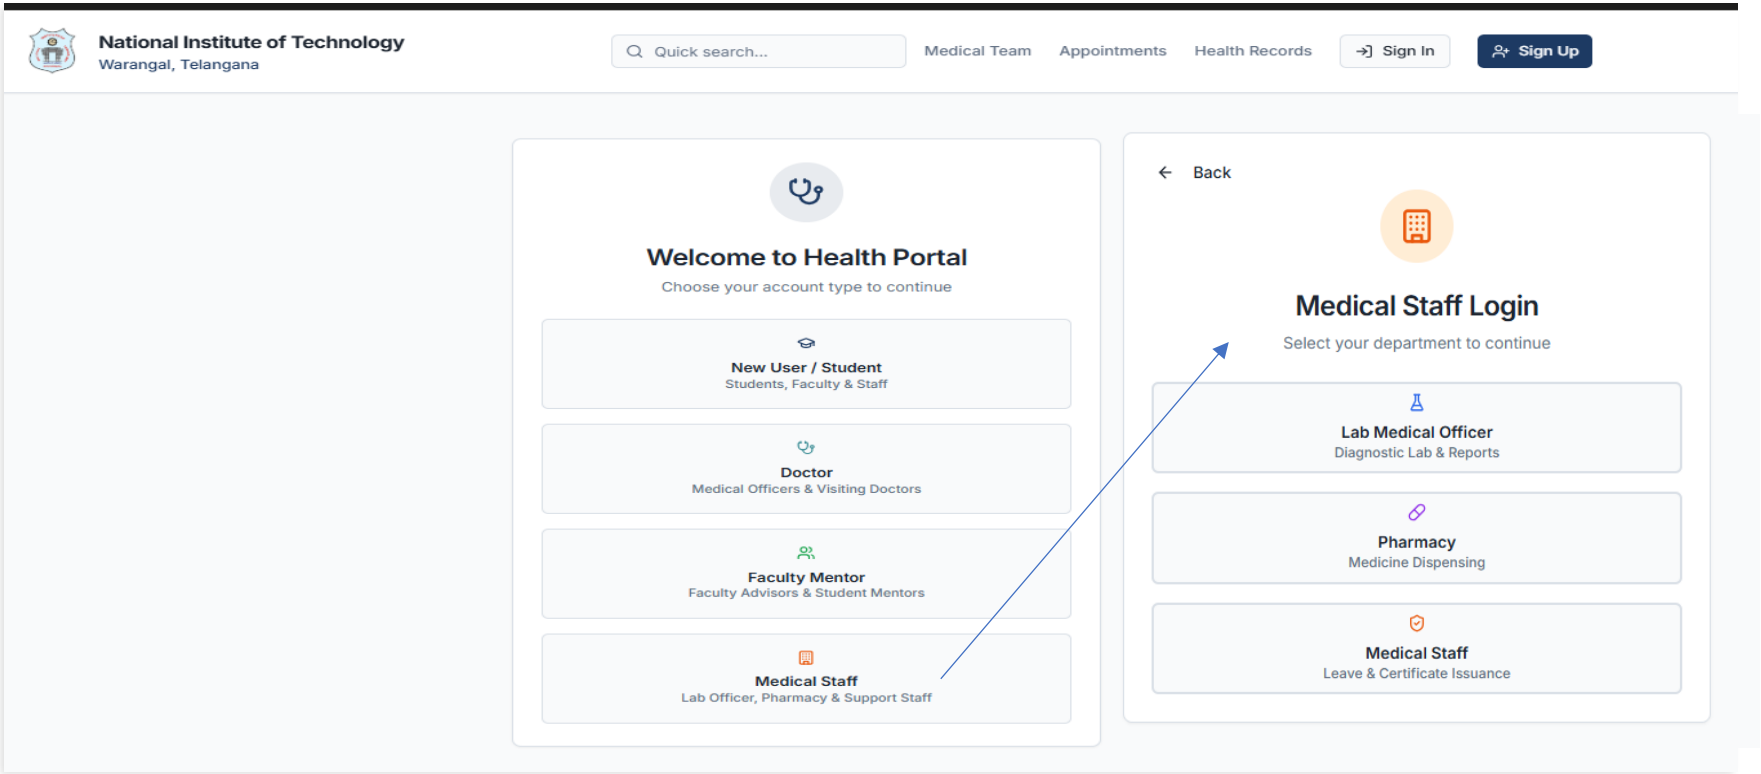
Health Portal — Landing Page

Secure role-based authentication for students and medical professionals



Role-Based Access Portal

Users select their account type to access the appropriate dashboard



Student Dashboard

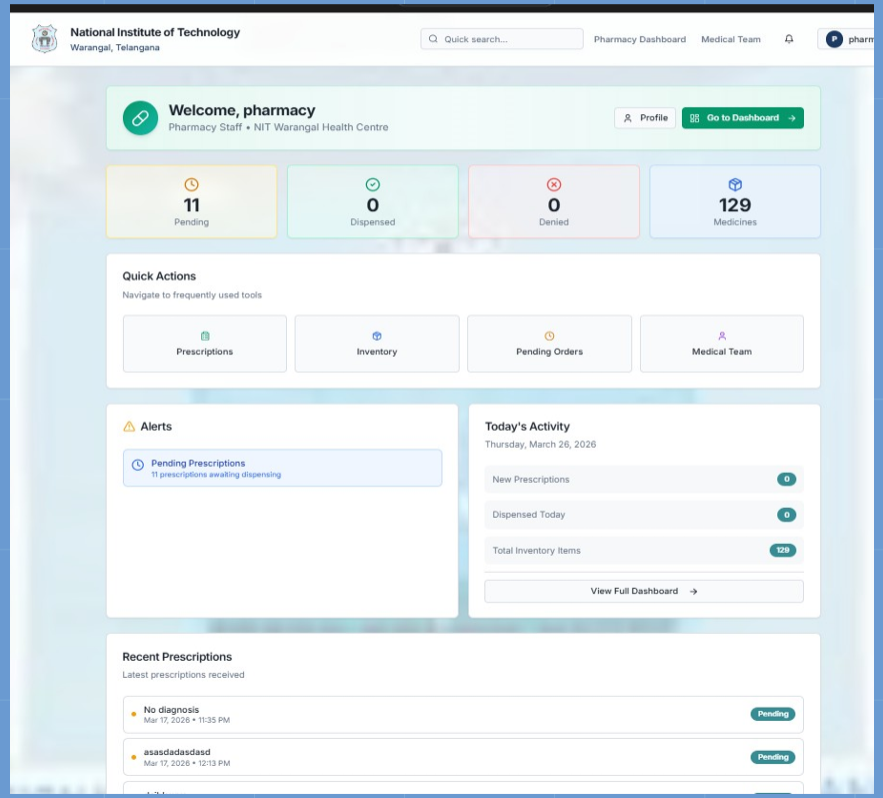
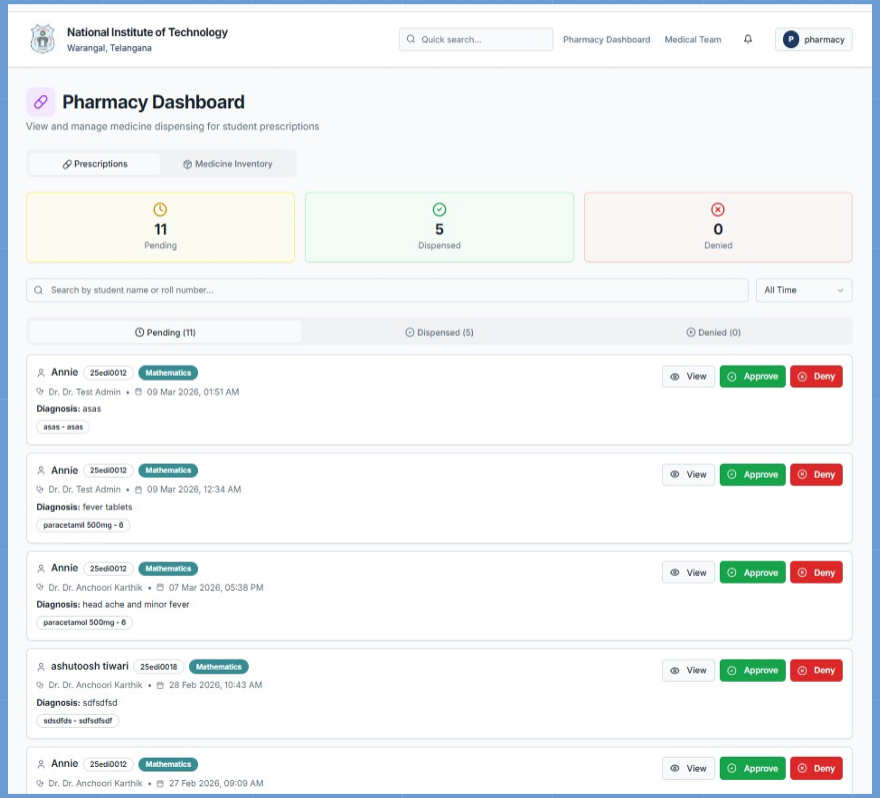
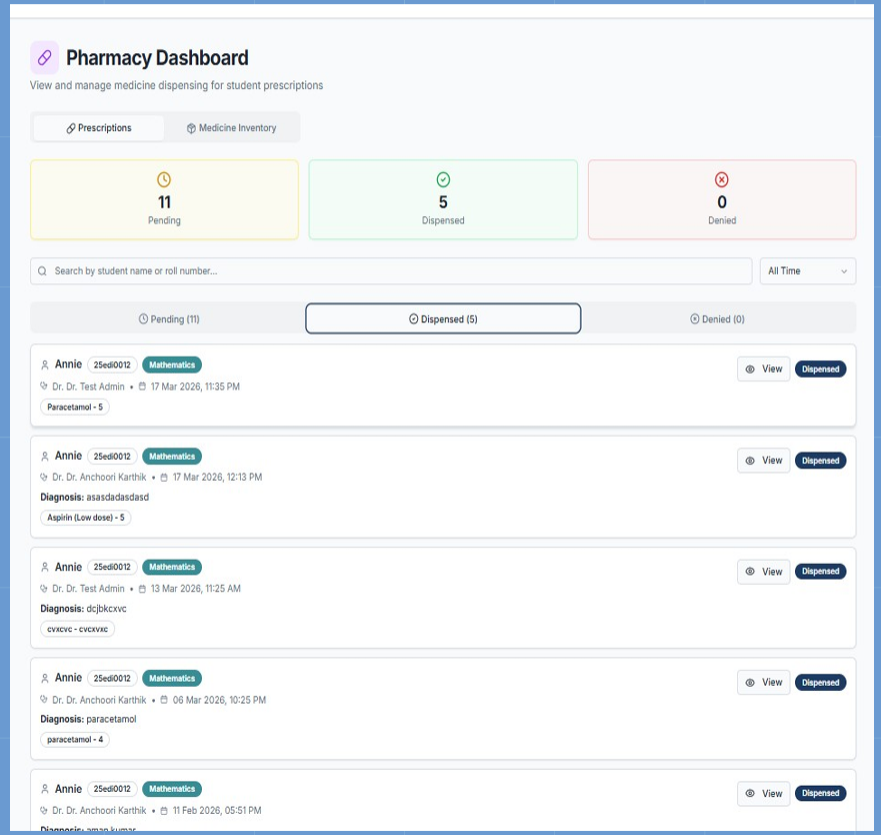
Pharmacy Dashboard

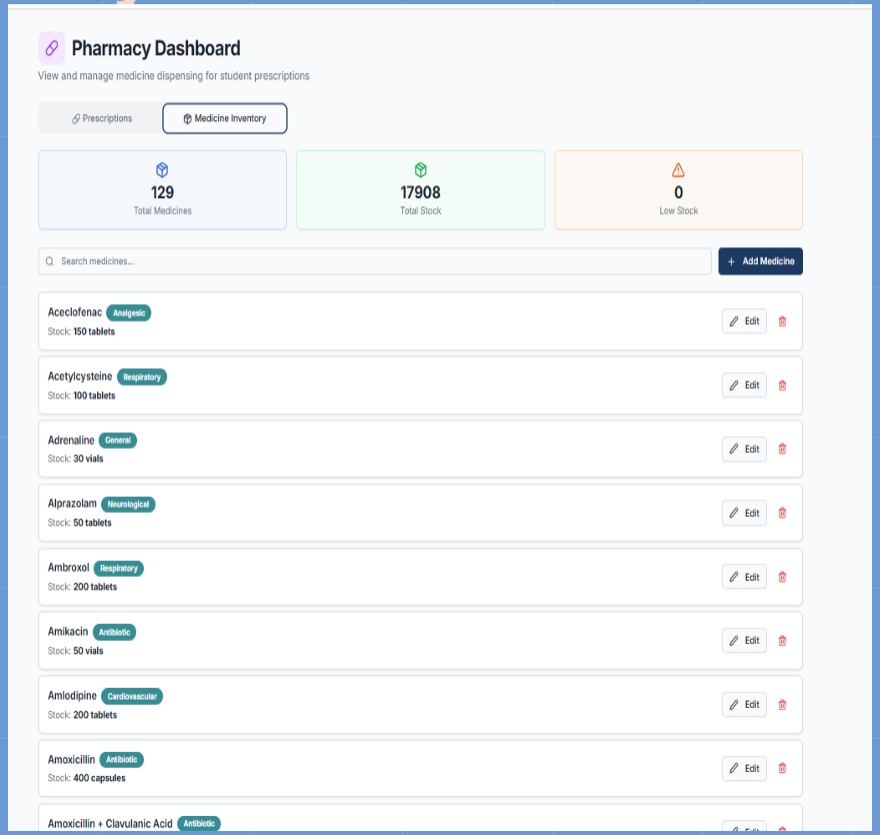
Medicine inventory, prescription queue, dispensing & stock management





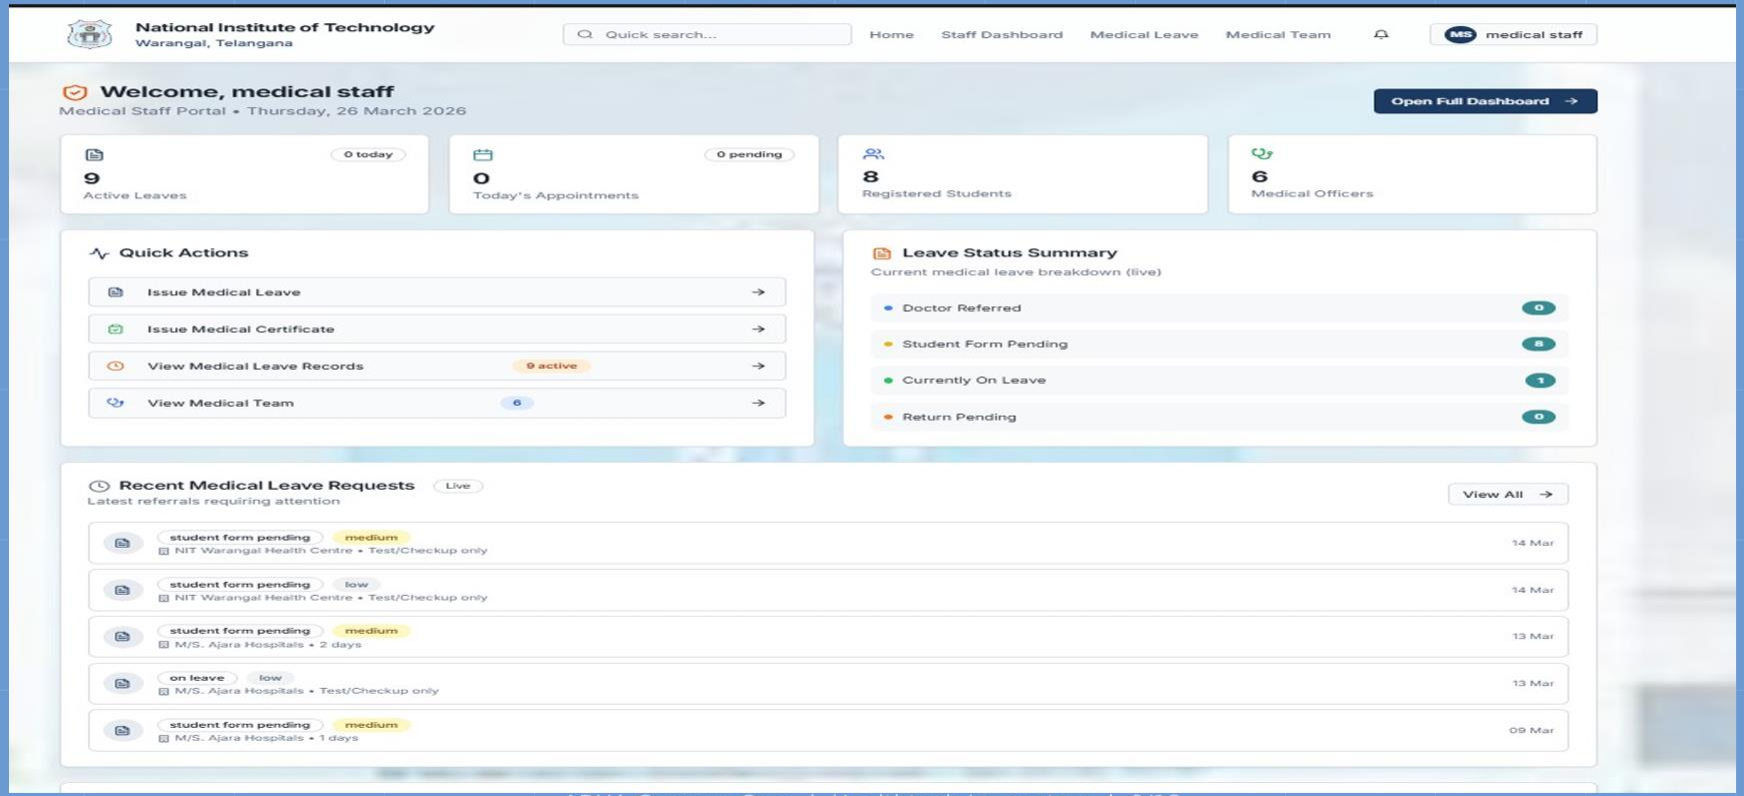
Pharmacy — Dispensed Records & Medicine Inventory





Medical Staff Dashboard

Patient vitals, first aid log, ambulance requests & emergency alerts



Key Benefits

100% Paperless

Eliminate paper records across the entire campus health centre

Real-time Tracking

Live status of appointments, prescriptions, lab tests, and emergencies

Role-based Access

Secure portals for six different stakeholder roles

ABHA Integration

As our government is using abha app . So similar to that we must have a campus / College based health data records .

Scalable Architecture

Easily deployable across multiple college campuses

Data Analytics

Health trends, usage patterns, and operational insights
